

We Make Any Battery Better

What our Customers are saying....

Jim Rosa, Service Manager

Quigley Communications
System Maintenance
San Diego CA

"I think there may be a place for the **ACT**ivator with every customer, and we would like to sell them. We would recommend it, now that I've seen it works.

I think it's a great deal because it works well. You plug it in, it charges the batteries in a very short time, and they work well. I'll tell everyone about it. As far as I'm concerned its a great product

I think it's a wonderful product and I think it has a great future.

Mark Youngblood

Duke Energy
Charlotte, North Carolina

"I didn't believe your claims that it would work so well, but it gave life back to three of five batteries. The manufacturer's charger did not even attempt to charge them. I must say, I am impressed. I can't believe how well it works. It's true -- you have to see it to believe it!"

San Diego Zoo

"The **ACT**ivator does real well. It is great. I have old batteries that I had tossed into a discard box and now I use them. There are batteries that lasted an hour and a half and now I'm using them for shifts. We will put them into our budget.

"The busiest day I've ever had was a recent Sunday. We had 16,000 visitors. I went through three batteries. I was *constantly* on the radio. The **ACT**ivators helped get radios back in service.

"It's an excellent piece of equipment and does just what it says you say it does, clearly. You definitely have a good product I'll certainly be glad to tell anybody that it works, I would probably have purchased a battery for my radio by now, but with this I didn't have to. I saved a battery. I will put this in my budget for next year.

"I will recommend this to other departments, and recommended it to the zoo."
